Dynaco was founded in 1987, dedicated to finding a solution for any damages caused by - and to - high-speed roll-up doors. Inspired by flexible pool covers, Dynaco designed the first ever flexible, self-repairing door, known as the Dynaco Classic.

Later, another innovation followed: Dynaco's revolutionary Push-Pull technology, marketed as the "magic" door. Thanks to this continuous innovative approach and passion, Dynaco is known for producing "the most copied door in the world".

The company distributes doors through a network of professionals only, active in 5 continents.
With its most extensive product range in the industry, Dynaco stays always AHEAD. And always operates with the end-user in mind.

Dynaco offers 2 different solutions for retails solutions: D-311LF and D-313LF, both specifically designed for high-traffic inside situations that require silent operations and an excellent seal.

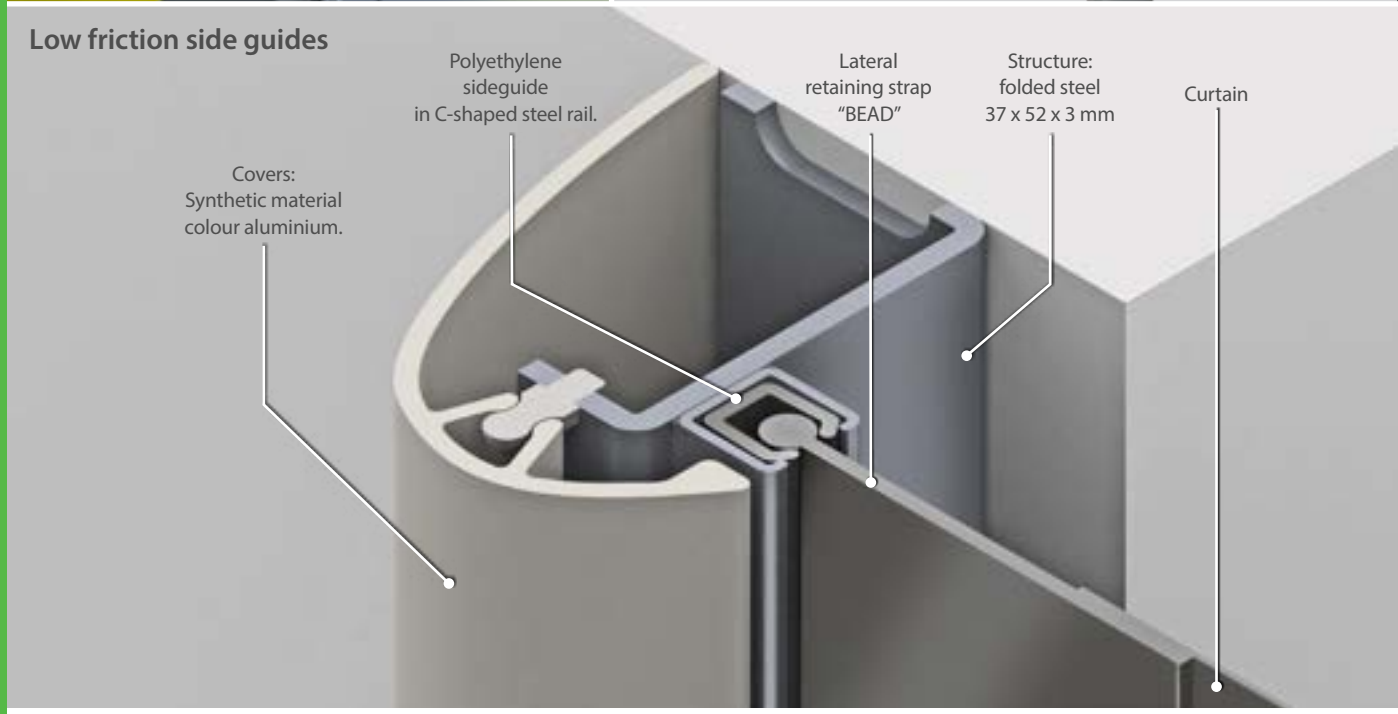
Low friction side guides



The Dynaco D-311 LF protects your environment against drafts, humidity, dust and dirt.

The Dynaco D-313 LF was designed for inside applications where seal, aesthetics and space requirements are crucial.

The operating speed and superior sealing properties of both models improve your traffic flows, while providing employee comfort, environmental control and energy savings.
Patented «LF» (Low Friction) technology, combined with a frequency inverter driven motor, ensures smooth and silent operation.

Why this is the right door for your business?

Silent operations

Both patented BEAD side guides and our Low Friction (LF) system allow for operations that have a minimal noise level, unsurpassed in the industry.

Extremely safe

At Dynaco we never compromise on safety.
All doors operate according to the highest safety standards, thanks to their soft bottom edge and our self-testing safety devices.

Reduced maintenance cost

With technical features such as our self-reinserting system, soft bottom edge and our frequency converter technology, Dynaco doors help you keep maintenance at a minimum.

Comfort of use

Dynaco doors are suited to a wide range of applications. Thanks to our different opening options and certified safety-devices, you are safe whenever you cross a Dynaco door.

Energy-saving

All Dynaco high-performance doors are designed to deliver the best possible sealing properties and minimal opening/closing cycle. Their dynamic barrier significantly reduce energy costs.

Uninterrupted workflow

Our high-performance doors are designed to guarantee continuous operation, no matter the traffic conditions.

Environment control

Dynaco doors not only open but also close fast. Their opening time is minimal to avoid temperature fluctuations that may affect product quality.

Perfect seal

Dynaco doors deliver significant energy savings, thanks to their patented side guides with «BEAD» technology. As production areas require the absence of dust, dirt and vermin, Dynaco doors offer a tight seal and high speed, which keep out any type of contaminant.

Why Dynaco?

Automatic self-reinsertion

At Dynaco we invented the crash-forgiving, self-reinserting door. The one and only original.
Its curtain automatically reinserts when dislodged, without intervention.
This means: no repair costs, nor costly production downtime.

Frequency converter

Dynaco doors operate with the most advanced drive unit in the industry. The combination of a frequency-driven motor and encoder offer smooth operation and reliability. Any wearable elements are reduced to a minimum.

Sleek, attractive design

Our doors' compact, sleek and minimalist design fits perfectly in any type of building architecture.

Patented BEAD side guides

Our patented BEAD side guides deliver the highest sealing properties, the best way to maintain environmental conditions and reduce energy costs. The Low Friction (LF) system allows not only for smooth and silent operation, but also increased safety, thanks to the absence of weight in the soft-bottom edge on every door.

Dynalogic control box

All doors can be fitted with a touch-screen control unit: our Dynalogic 5 control box.
The most user-friendly, self-diagnostic option, which allows for remote control management. It increases efficiency and helps you monitor any door's status. At any time, from any desk.

Certified performance

Performance of all Dynaco doors has been tested and certified by a third-party notifying body.

Dynaco offers a wide range of products for several industrial applications.
